

guided maths: The teaching sequence

Hot Spot

This gets students warmed up for the lesson.
It is usually number knowledge based.

Modelled Activity

This is the chunk of the learning and teaching.
It is usually number strategy based.

An example of how the modelling can go:

1. Solving a problem as a whole group with teacher modelling and instruction
2. Solving a shared problem independently
3. Solving individual problems

Follow Up

This practices and confirms the learning from the session.

This could be practice questions, activities, games, worksheets or learning online.
