

# Learning stories

## A roadmap for teachers

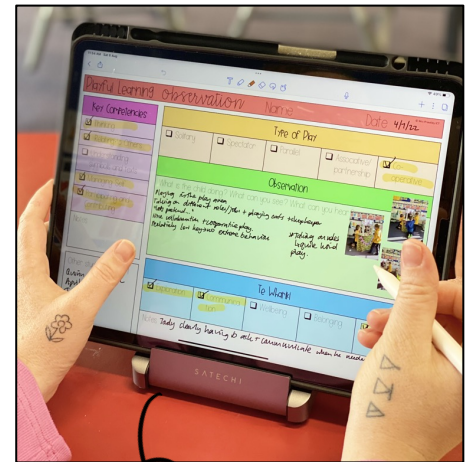

Start with creating your criteria for the learning stories.  
What are you wanting to show case?

Develop an observation template that you can use to note down and track against your criteria.

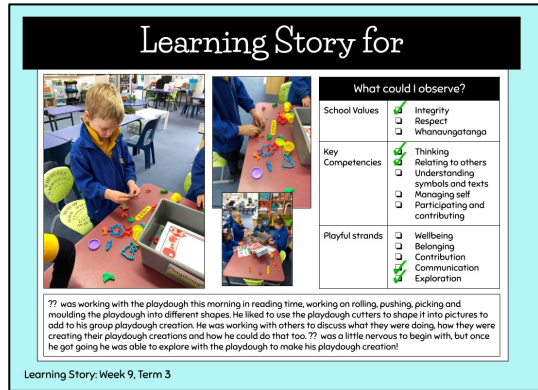

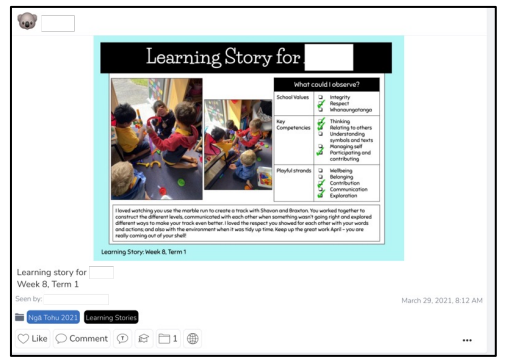

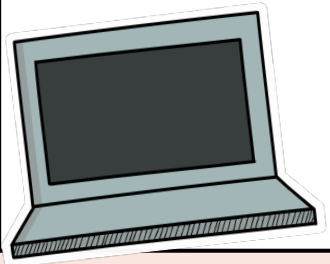

Observe students and note down everything and anything related to the criteria. Take photos and videos to support the observation.

Share your learning story with family and whanau! It could be in something like a paper based portfolio, or online digital app like Seesaw!

Create a learning story template to share what you observed above. Insert those photos and videos to support your noticing.
