

HOW TO MAKE SLIME

Ingredients:

White or clear glue

Baking soda

Shaving cream

Food Colouring

Foam soap

Contact solution

Method:

Add 1/2 cup of white or clear glue to a bowl

Add 1 teaspoon of baking soda - mix together

Add 1/2 cup of shaving cream to the bowl and 1 or 2 pumps of foam soap. The foam soap is optional but does make it more soft to the touch.

Add in a few drops of your food colouring

Add in squirts of contact solution to the bowl and mix. When it starts getting sticky, put it on the table and add more contact solution but use your hands to mix it together. Continue adding more contact solution while mixing it with your hands until it is smooth and stretchy.

Keep it in a container.
